

**PROGRAM:** Discussion and demo of Sock Knitting Machine.

**Instructor:** Loan N.

Sock machines were used to support the troops during WW I and now back to popularity among knitters who want to knit a pair of socks in one hour. The machines can knit from heel to toes with just a bit of hand finishing to close the seam. Come see antique and modern machines in action demonstrated by our local cranker, Loan N.

Loan is happy to sell some of her machine made socks as they are taking over her house!

This will be outside in the parking lot at the end of the meeting.
