

## **PROGRAM: ZANY ZIGZAGS**

There are many ways to create zigzag patterns when knitting -- some are very simple, some a little more complicated. We'll practice on one or more as time permits, to enjoy these rippling patterns. Zigzags may be worked in tops, skirts, purses, scarves, hats, mittens, blankets and in almost anything else you may knit. If you have a knitted piece already created with a "zigzag" stitch, please bring it in to share with others. It will be fun to see the variety of creations already produced by our members.

**INSTRUCTOR:** Cynthia W.

**HOMEWORK:** Cast on 30 stitches using any yarn with appropriately sized needles. Worsted weight is always good for practice, but it really doesn't matter which weight you use. If you have some multi-color yarn with long color components (such as Noro), you might want to use that for zigzag stripes, but solid colors are fine, too. Work 4 rows in garter stitch and bring your work still on the needles to the meeting.
